

**HydroFLOW USA Receives the Water Environment Federation’s
Innovative Technology Award**

On October 3, 2017 HydroFLOW USA was presented with the WEF Innovative Technology Award during WEFTEC® 2017, the world’s largest annual water quality conference and exhibition, in Chicago.

The Innovative Technology Award recognizes WEF Associate Members who have introduced new innovative products or services related to the construction, operation or maintenance of treatment facilities.

The HydroFLOW product, powered by Hydropath technology, showed to be extremely innovative with field data supporting the claims of removing struvite build up in pipelines. This product could have an extreme benefit for many plants around the US struggling with this issue in their digesters, connecting pipes and dewatering devices.

“We are very proud of the progress that we’ve made in the wastewater industry and we look forward to furthering our influence in this sector”.

About WEF

The Water Environment Federation (WEF) is a not-for-profit technical and educational organization of 34,000 individual members and 75 affiliated Member Associations representing water quality professionals around the world. Since 1928, WEF and its members have protected public health and the environment. As a global water sector leader, our mission is to connect water professionals; enrich the expertise of water professionals; increase the awareness of the impact and value of water; and provide a platform for water sector innovation.
